**Empyrean Energy PLC**  
 ("Empyrean" or the "Company"; Ticker: (EME))

### **Operations Update** **Testing operation in Progress at Eagle North-1 in California, USA**

AIM quoted Empyrean Energy Plc today announces the following update on the Eagle North-1 well, San Joaquin Basin, California, USA.

Victoria Petroleum NL as operator for the Eagle North-1 horizontal well in the Eagle Oil Pool Development Project in the San Joaquin Basin advises that production testing operations are continuing at the Eagle North-1 horizontal well with results providing sufficient encouragement for further testing.

In order to continue the production testing operations in a much more cost effective and technically efficient manner, a completion rig is in the process of being secured. Accordingly the large drilling rig is currently rigging down to allow the completion rig to move onto site. The completion rig is anticipated to move onto location this coming week. Following the arrival of the completion rig on location a coiled tubing unit will then be secured to continue the production testing operation.

The information contained in this announcement has been reviewed by the Technical Director of Empyrean Energy Plc, Mr Frank Brophy BSc (Hons) who has over 40 years experience as a petroleum geologist.
