Empyrean Energy PLC

("Empyrean" or the "Company"; Ticker: (EME))

"COMMENCEMENT OF KOWALIK-1H FRACTURE STIMULATION PROGRAM"

Empyrean is pleased to report that it has been advised by the operator, Texas Crude Energy Inc (TCEI), that fracture stimulation operations on the Kowalik-1H well commenced on 28 December 2009, with the stimulation of approximately 3,800 feet of the slotted liner section presently underway.

Following stimulation of this section with a single large treatment, the remaining 850 ft of conventional solid liner will be treated in four stages with an isolation plug between each one.

This program is anticipated approximately 7-14 days to complete following which the well will be cleaned up, completed for production and flowed to sales.

Further updates will be provided as significant developments occur.
