*The wells have had the Average Daily Equivalent Oil Rate recalculated on a simple 6:1 basis.

Further production results will be released as they come to hand.

Operations

Empyrean currently has a total of 63 wells in production at the Sugarloaf Project. In addition, there are currently two wells being drilled and a further three wells in the process of having completion / stimulation operations carried out.

Commenting today, Empyrean CEO Tom Kelly said, "These strong flow rates, in particular from the two wells reporting 60 day average rates are providing further encouragement."

The information contained in this announcement was completed and reviewed by the Technical Director of Empyrean Energy Plc, Mr Frank Brophy BSc (Hons) who has over 40 years experience as a petroleum geologist.
