## Highlights

---

- Strategic restructuring - finalised sale of 3% working interest in the Sugarloaf AMI project on 19 February for US\$61.5m plus contingency payments of up to a further US\$10m (the “Sale”)
- The Company settled outstanding Commodity Swap Transactions (the “SWAP”) with Macquarie Bank when the West Texas Intermediate oil price was approximately US\$30, for a settlement amount of US\$1.582m. Further details of the SWAP are provided under Commodity risk section of this report. The proceeds from the SWAP were used to repay the debt owed to Macquarie Bank under the loan facility
- US\$17m converted to approximately £12m to create a natural currency hedge given that further receipts in US\$ are expected under the Sale and Purchase Agreement (approximately US\$6.15m, being 10% of the Initial Purchase Price, subject to adjustments under the terms of the Sale) for the Sugarloaf AMI sale
- Repayment of the Company’s loan facility with Macquarie Bank was achieved subsequent to the Sale
- Empyrean is now debt-free with surplus cash and it remains the Company's intention to retain sufficient funds to meet its on-going working capital requirements and the maintenance and development of its remaining assets
- Plans to return all surplus funds received from the Sale to shareholders as quickly and efficiently as possible
- Major costs across all areas of the business are being reduced with total Directors salaries already having been reduced by 37% during the reporting period
- Revenue, profit and production down over the period due to the sale of the Sugarloaf AMI
  - profit after tax for the 12 months to 31 March 2016 of US\$0.913m (2015: US\$1.747m profit)
  - Sugarloaf AMI production net to Empyrean (after royalties) for the 6 months to 30 September 2015 of 224,182 barrels of oil equivalent (2015: 366,469 barrels of oil equivalent)

**Empyrean CEO Tom Kelly said,** “The sale of our flagship Sugarloaf AMI Project in February 2016 for US\$61.5m with the potential for contingency payments of up to a further US\$10m if the oil price rises is an excellent deal for Empyrean under challenging market conditions. The Sale has allowed us to repay our loan facility with Macquarie Bank Limited, pay all costs associated with the Sale and be debt free with surplus cash. In addition we took advantage of the low oil price in a timely fashion as the Sale was nearing completion and closed out our hedging facility to generate a further US\$1.582m. We have announced plans to complete a return of capital to shareholders, which is a priority, and will seek opportunities to maximise value for shareholders from our remaining assets. The last 12 months have been for the Company and the oil and gas industry as a whole, with a number of companies unable to raise capital or repay debts. Empyrean would like to thank its shareholders for continuing to be supportive and patient during this time.”

## Chairman's Statement

---

I am pleased to report that Empyrean has completed its eleventh year of operations, and has successfully implemented a major restructuring of its activities.

In the first half of this financial year the Company continued its growth, increasing its oil and gas production substantially, while an independent appraisal and updated reserves report by DeGolyer and MacNaughton revealed a further significant increase of our Reserves and Resources at our principal asset in the Sugarloaf AMI. Building on these consistently improving results, the Company announced on 18 January 2016 that it had secured a conditional purchase and sale agreement with Carrier Energy Partners II LLC ("CEPII"), a Delaware corporation, to dispose of its interest in the Sugarloaf AMI development for an initial cash consideration of US\$61.5m. We may also receive additional contingent payments, of up to a maximum of US\$10m, subject to specified increases in the oil price before 31 December 2017.

This agreement, which had an effective date of 1 October 2015, was approved by shareholders at a General Meeting on 9 February 2016, and the transaction reached financial close on 19 February 2016. The transaction crystallised the value of the Sugarloaf AMI Project at a time when there were significant challenges facing the resources sector in general and, specifically, when the additional financing required to support the Company's continued participation in the development of the asset in the prevailing low oil price environment would have incurred either an unacceptable cost or an unacceptable dilution, or both.

In line with the Board's stated strategy, in the last year the Company had continued to demonstrate the future upside potential of the Sugarloaf AMI project and to deliver significant increases to its reserves. The Board concluded that it was the right time to realise the value of the asset, and shareholders endorsed that decision. The terms secured will unlock opportunities to develop our remaining assets and others that may arise at a time when drilling and associated costs are significantly reduced, and when a number of operators and market participants are financially distressed. Empyrean will, as a debt-free entity with sufficient working capital, be well placed to build value.

The Company also relinquished its interests in Block A on 1 March 2016. It had held a 7.5 % interest in two wells and lesser interests in another 6 wells all of which produced gas, condensate and natural gas liquids, but in declining volumes.

In conclusion, our remaining assets and, in particular the Eagle Oil Pool Development project in California will provide possible future development opportunities as energy prices recover. We have been fortunate enough to be able to repay all of our debts and have embarked upon analysis for the efficient return of capital to shareholders. We will also continue to look for suitable opportunities to increase shareholder value.

A handwritten signature in cursive script that reads "Patrick H. Cross".

**Patrick Cross**

Non-Executive Chairman

17 August 2016

## Strategic Report

---

### **Business Overview and Likely Future Developments**

Empyrean was established to finance the exploration, development and production of energy resource projects in geopolitically stable environments. The Company has typically focused on non-operating working interest positions in projects that have drill ready targets that substantially short cut the life-cycle of hydrocarbon projects by entering the project after exploration concept, initial exploration and drill target identification work has largely been completed.

Empyrean's core asset was a 3% working interest in the Sugarloaf AMI in Texas which was an advanced Eagle Ford Shale condensate, gas and natural gas liquids development operated by Marathon Oil Corporation ("Marathon", NYSE:MRO). The Company identified and negotiated an interest in this project at the exploration stage immediately prior to drilling and was part of the initial discovery well. The Company's shareholders approved the sale of the Sugarloaf AMI for US\$61.5m, plus contingency payments of up to a further US\$10m if oil prices rise, on 9 February 2016 and financial close occurred on 19 February 2016. After repaying its debts, the Company now has surplus cash. The Company has applied to the Internal Revenue Service (IRS) for a Withholding Tax Certificate that has now been accepted by the IRS and the surplus tax that was withheld has been released back to the Company. At financial close, on 19 February 2016, US\$10.725m was withheld in escrow under US taxation law to meet Empyrean's US taxation liability on the Sale. The Company's US tax advisors have estimated that a total of approximately US\$3.5m in tax may be due to the sale. In addition there is US\$6.15m held in escrow under the terms of the Purchase and Sale Agreement (PSA). Up to half of the escrowed amount, subject to any adjustments, is due to be released six months following financial close with the balance of escrowed funds, subject to any adjustments, due to be released one year following the financial close. The Board believes that it is prudent to receive both the judgement of the IRS in respect of the Application (and any refund due thereafter, which has now been received) as well as the first tranche of escrowed funds under the PSA, both of which will materially impact the funds available to the Company, before finalising plans for a distribution to shareholders. In the meantime, the Company continues to take advice on the most tax efficient manner in which to effect such a distribution and to clarify the procedure required, which may involve both shareholder approval and court approval. The Company's non-core assets are outlined within the Operational Review.

### **Operations and Outlook**

As at 31 March 2016 the Company had a 58.084% working interest in the Eagle Oil Pool Development Project asset in California and a 10% working interest in the Riverbend Project in Texas. The Company intends to continue to re-focus on its exploration assets and other opportunities that arise. The Company has commenced a review to reduce costs across all sectors of the business as it transitions from a producer back to exploration.

### **Strategy**

Our goal is to maximise value for shareholders. Our strategy is to allocate our resources appropriately given the risk versus reward profile of our projects in order to achieve our goal. The last few years have seen the Company focus resources and effort on its flagship development asset, the Sugarloaf AMI. Risk assessment and evaluation is an essential part of the Company's planning and an important aspect of the Company's internal control system. The principal risks and uncertainties are considered to be the following:

## Strategic Report (Continued)

---

### Exploration, Development and Production Risks

Exploration and development activities may be delayed or adversely affected by factors outside the Company's control, in particular; climatic conditions; performance of joint venture partners or suppliers; availability, delays or failures in commissioning or installing plant and equipment; unknown geological conditions resulting in uneconomic or dry wells; remoteness of location; failure to achieve estimated capital costs, operating costs, reserves, recovery and production levels; actions of host governments or other regulatory authorities; and failure to find a hydrocarbon or finding uneconomic hydrocarbons.

### Commodity Risk

The demand for, and pricing of, oil and gas is dependent on global and local supply and demand, weather conditions, availability of alternative fuels, actions of governments or cartels and general economic and political developments. Empyrean announced on 8 April 2015 that it had entered into Commodity Swap Transaction (the 'SWAP') contracts with Macquarie bank for an aggregate 97,371 barrels of oil ('bbl') for a period of 12 months commencing 1 April 2015 through to 31 March 2016. The SWAP was for a fixed price of US\$51 per bbl based on OIL-WTI-NYMEX ('WTI'). In addition, the Company had entered into put and call option arrangements (the 'Options') with Macquarie to effect a collar in respect of 102,469 bbl for a period of 24 months commencing 1 April 2016 through to 31 March 2018 with prices between US\$50 and US\$62.80 per bbl. These contracts were settled on 26 January 2016 for an amount of US\$1.582m.

### General and Economic Risk

As a consequence of activities in different parts of the world, the Company may be subject to political, economic and other uncertainties both locally and internationally, including but not limited to inflation, interest rates, market sentiments, equity and financing market conditions. In particular, the Company's remaining exploration assets are located in the USA and currently require US\$ denominated funding to take them forward.

### Financing Risk

Future investment is dependent on having sufficient funds to enable the exploration or development of projects, whether through debt or equity funding. During the financial year, Empyrean repaid all of its debt under a loan facility held with Macquarie Bank. The Company intends to use a portion of the US Dollar proceeds from release of the escrow account to fund its exploration asset programme and obligations in the US and amounts held in Pounds Sterling will be used to settle UK-based costs. There is the potential to be exposed to foreign exchange losses or profits on any funds that the Company converts into GBP.

### Market Risk

Securing sufficient and profitable sales contracts to support operations is a key business risk. Empyrean's exploration project in California, the Eagle Oil Pool Development Project, is currently undergoing renewing of certain leases. Whilst the lease programme is underway a portion of leases have already been successfully re-negotiated, there is some risk that some leases may not be able to be negotiated or that the terms may be different.

## Strategic Report (Continued)

---

### Environmental Risk

For some assets, the Company is dependent on other operators for the performance of exploration and production activities and will be largely unable to direct, control or influence the activities and costs of these operators. The Company carefully considers the technical, HSE and financial capabilities of future potential operators during any farm-out process.

### **Directors' Remuneration**

The Company's policy on remuneration of Directors is to attract, retain and motivate the best people, recognising they are key to the ongoing success of the business. Details of the Directors' emoluments and of payments made for professional services rendered are set out in Note 5 to the Financial Statements.

### **Financial Position and Performance of the Business**

The sale of Sugarloaf AMI has seen the financial position of the Company change dramatically:

- debt repayment of US\$23.435m
- cash position of US\$17.473m
- reduction in oil and gas properties to US\$6.998m

Net profit after tax for the year was US\$0.913m (2015: US\$1.747m net profit) which arose due to low oil prices and a loss on the sale of the Sugarloaf Block A project.

### **Key Performance Indicators**

Over the last few years the key financial performance indicators ("KPI's") for the Company have been revenue and net profit detailed above. The key non-financial KPI's are the Company's reserves and share price. Given the recent sale of the Company's primary producing asset, Sugarloaf AMI, revenue, net profit, reserves and share price are no longer a reliable indicator of performance for this period. Moving forward and following the planned distribution to shareholders, the Board will transition the Company's KPI's appropriately with an initial focus on the implementation of future exploration strategy, budget and outcomes with a view to adding value for shareholders – it is expected that the Company's share price will again become a KPI.

## Strategic Report (Continued)

The Company announced reserves during 2015 as summarised below:

Sugarloaf AMI (EME 3%, net 2.25% after royalties)	Revised 30 Jun 2015 MMboe	Reported as at 31 Dec 2014 MMboe	Increase %
1P Reserves	6.58	5.78	14
2P Reserves	14.11	12.64	12
3P Reserves	23.19	20.91	11
2P + 2C	15.59	15.49	1

The share price performance over the 24 months to 16 August 2016 is represented graphically below. Empyrean shareholders approved the sale of Sugarloaf AMI on 9 February 2016 and financial close of the transaction occurred on 19 February 2016. Global oversupply of oil resulted in a rapid decline in oil prices between third quarter 2014 and fourth quarter 2015.

The strategic report was approved by the board on 17 August 2016 and signed on the Board's behalf.

**Thomas Kelly**  
Chief Executive Officer  
17 August 2016

## Operational Review

---

Until the sale of its 3% working interest (“WI”) in Sugarloaf AMI (formerly Block B), Empyrean’s operational activities had been almost solely focused on development drilling on this project. The sale of its WI took place on 19 February 2016 to CEPII with the transaction having an effective date of 1 October 2015.

Located onshore Texas in Karnes County, the Sugarloaf AMI project occupied approximately 24,300 acres. The primary objective has always been the Cretaceous Eagle Ford Shale, with the overlying Austin Chalk an important secondary objective. Marathon replaced Hilcorp Resources (“Hilcorp”) as operator in 2011, and since then has maintained an accelerated drilling programme involving over this recent 12 month period an average of nine wells spudded a month.

Empyrean also relinquished its interests in Block A with an effective date of 1 March 2016. Until then it held a 7.5% WI in two producing wells and lesser interests in another six producing wells all operated by ConocoPhillips. All eight wells produced gas, condensate and natural gas liquids (NGL’s).

Empyrean retains a 10% WI in the Riverbend Project located in the Tyler and Jasper counties, onshore Texas. A 58.084% WI is also held in the Eagle Oil Pool Development Project, located in the prolific San Joaquin Basin onshore, southern California and operated by Strata-X Energy.

### **Sugarloaf AMI (3% WI)**

The Eagle Ford Shale is the primary target in the Sugarloaf AMI. The lithology is in general a calcareous, shale consisting of a variety of microfacies. The AMI is well-located geologically in a region where the organic material embedded in the shale has been subjected to the temperature –time conditions required to generate wet gas (gas-condensate). The Eagle Ford Shale is an “unconventional” play, which means that it can only be exploited by employing horizontal drilling and fracking. The fracking process releases hydrocarbons held in the shale microfractures by creating, under extreme pressure, larger, interconnected fractures. The horizontality exposes a greater volume of the reservoir to a lower pressure regime and hydrocarbon migration is thus made possible in what was once an impermeable source rock.

Since becoming operator, Marathon has been instrumental in improving both drilling and fracking (including “Stack and Fracc”) techniques. The results are manifest in the decreased drilling costs and substantial improvements in 30 day initial well head production. Well spacing of 60 acres has also improved productivity markedly.

During the period 1 April 2015 to 16 February 2016 (when reporting of well activity ceased), 97 wells were spudded. The rate peaked in May 2015 with a record 14 wells, while an impressive 10 wells were spudded in June and December 2015. Common pad drilling, sometimes involving up to eight wells, has greatly reduced mob – demobilisation costs. Marathon estimated a reduction in exploration and production costs per oil equivalent barrel of approximately US\$8 /barrel and completion costs have fallen by approximately 15%.

## Operational Review (Continued)

---

The lithostratigraphic understanding of the area has evolved as more data becoming available with the increased drilling. The operator identified four distinct vertical units in the Late Cretaceous objective formations which are separated by three regional barriers. The younger Austin Chalk, with an average thickness of 100 ft, overlies the Upper Eagle Ford Shale (average thickness 45 ft). The two formations are separated by several layers of volcanic ash which can act as effective permeability barriers. The Upper Eagle Ford Shale overlies the Lower Eagle Ford Shale (average thickness 135 ft) which is divided into an upper and lower member. These two members are separated by a tight lime band which can also act as an effective, impermeable barrier to vertical hydrocarbon migration.

Of the wells spudded between April 2015 and February 2016, Kennedy 320H (ex AC 7H) had the longest measured depth at 20,445', reached on 3 September 2015 in the Lower Eagle Ford Shale. Measured depths varied depending on geographical location and stratigraphic objective of the well. The Lower Eagle Ford Shale was the primary target (47 wells) while the Upper Eagle Ford Formation (18 wells) and overlying Austin Chalk (32 wells) secondary targets. Wells completed in the Upper Eagle Ford Shale sometimes had lesser measured depths of 15,684' (Rancho Grande 501H). The Austin Chalk wells ranged between 17,758' (Urrutia AC 2H) and 19,149' (Hollman AC 12H) measured depth. In general, the measured depths for all wells averaged between 16,000' and 19,000' with horizontal distances between 4,200' and 7,900'.

Production figures have improved since 2011 when Hilcorp, the previous operator, began production from Direct Assets 1H. Since April 2015, the well May Unit 1 12H has shown the best 1P results of those reported to February 2016. It commenced production on 6 October 2015 from the Lower Eagle Ford Shale. Having reached a measured depth of 16,540' on 24 May 2015, the well produced 65,759 msc.ft of gas and 26,701 barrels of condensate during the month of October 2015. Robert Bowman 4H reached a measured depth of 16,530' in the Lower Eagle Ford Shale on 14 April 2015 and commenced producing on 3 December 2015. Well head production for December 2015 was 63,541 msc.ft of gas and 25,846 barrels of condensate. These two wells were the best producers reported during the 12 month period.

The monthly well head total production rose from 3,895,631 msc.ft of gas and 1,1068,651 barrels of condensate in October 2015 ( 260 producers) to 5,264,027 msc.ft and 1,142,962 barrels of condensate (290 Empyrean producers) at the end of January 2016. The normal depletion trend for similar fractured shale reservoirs has been counterbalanced by the continuous increase in the number of producing wells.

The Austin Chalk overlies the Eagle Ford Shale and in some instances it is difficult to distinguish between the two formations. It is a valid secondary target and Marathon has committed to appraise and pursue co-development possibilities. The formation is still in the relatively early stages of appraisal. Between April 2015 and March 2016 the number of Austin Chalk producers increased to 60 in which Empyrean was a participant. Empyrean held an interest in 27 of the 33 Austin Chalk wells that commenced producing during April 2015 to December 2015. During that period, May AC 12H, which commenced producing on 7 October 2015, was the most impressive of the Austin Chalk wells producing, 65,659 msc.ft of gas and 26,701 barrels of condensate at the wellhead.

As of 18 February 2016, 353 wells had been spudded, 290 in which Empyrean held an interest prior to the sale to CEPIL.

## Operational Review (Continued)

---

As the number of producing wells increased during this period, so too have the recoverable reserves attributable to Sugarloaf AMI. On 13 October 2015 Empyrean published results of the independent appraisal carried out by DeGolyer and MacNaughton. These results showed an increase of more than 10% across all reserve categories despite the economic climate, which is one of the essential factors influencing the classification of reserve categories. Effective to 30 June 2015, proven reserves (1P) showed an increase of 13.84% over the results of December 2014 to 6.58 million barrels of oil equivalent ('MMBOE'). 2P (proven plus probable) showed an 11.63% increase to 14.11 MMBOE. The Upper Eagle Ford Shale was not included in the estimates.

### **Sugarloaf Block A (7.5% WI)**

ConocoPhillips continued as operator in the adjacent Block A. Empyrean participated in the drilling of the first well as part of a farm-in agreement dating back to May 2007 (Kunde#3). This well was also the first to commence production in April 2008. Empyrean decided not to participate in further exploration drilling in Block A after the drilling of the fifth well, Marlene Olson#1 in 2008.

However, in more recent times Empyrean has elected to participate, albeit at much reduced working interests, in the drilling and completion of another seven wells which partly fall within Empyrean's acreage. These are the wells, Baker Trust 4, Marlene Olson 3, Lucille Klein A1, and Marlene Olson #4, 5, 6 and 7. The last five wells were spudded in 2014 and Marlene Olson #5, 6 and 7 commenced producing in April 2015. The more recently drilled wells have all measured total depths of greater than 20,000 ft. Production continues to be from the Lower Eagle Ford Shale and rates have been maintained at a fairly consistent level for the more recently producing Marlene Olson wells 5, 6 and 7.

Kunde Unit A B1 (formerly Lucille Klein A1), is the eighth well drilled in which Empyrean held an interest (WI 3.154661%). The well was once was the best producer. It reached a measured TD of 19,325' and commenced production on 17 July 2014. During the first complete month of production in August 2014 the well produced 48,874 msc.ft of gas and 17,100 barrels of condensate. A year later in September 2015, it produced 10,236 barrels of condensate and 37,955 msc.ft of gas. More recently, in February 2016 there has been a decline to 4,075 msc.ft of gas and 2,039 barrels of condensate. Marlene Olson 5, which commenced producing on the 8 April 2015, produced 53,667 msc.ft of gas and 10,024 barrels of condensate in February 2016 but output appears to have subsequently declined.

As of 1 March 2016, Empyrean relinquished all of its interests in the 8 producing wells and all of its rights to participate in further drilling in Block A. The total well head production for February 2016 of 65,659 msc.ft of gas and 34,289 barrels of condensate showed a marked decline from the December 2015 figures of 288,254 msc.ft of gas and 50,755 barrels of condensate.

### **Riverbend Project (10% WI)**

The Cartwright No1 re-entry well produces from the arenaceous Wilcox Formation. Production commenced on 13 May 2013, and well head rates rapidly decreased to a monthly production in June 2014 of 2,687 msc.ft of gas and 83 barrels of condensate. Thereafter, Cartwright No1 re-entry has been shut in intermittently. The well is now virtually suspended producing only nominal amounts of gas condensate. Full production will recommence once the economic environment improves.

## Operational Review (Continued)

---

### Eagle Oil Pool Development Project (58.084% WI)

Located in the prolific San Joaquin Basin onshore, southern California this Development project has received little attention in the last 12 months due to the economic climate. No appraisal operations were carried out during this 12 month period. It is anticipated that a vertical well test of the primary objective, the Gatchell sands, followed by a horizontal appraisal well, would be the most likely scenario at some future time, dependent on world oil prices.

### Definitions

**1P** Proven reserves. There should be at least a 90 percent probability that the quantities actually recovered will equal or exceed the estimate under existing economic and political conditions

**2P** Proven plus probable. There should be at least a 50 percent probability that the actual quantities recovered will equal or exceed the 2P estimate

**2C** Contingent resources are quantities of petroleum estimated, as of a given date, to be potentially recoverable from known accumulations by application of development projects, but which are not currently considered to be commercially recoverable. The range of uncertainty is expressed as 1C (low), 2C (best) and 3C (high)

**3P** Proven plus probable plus possible. There should be at least a 10 percent probability that the actual quantities will equal or exceed the 3P estimate

**MMBOE** Million barrels of oil equivalent

**Production** Production available for sale

**WTI** West Texas intermediate crude, type of oil used as a benchmark in oil pricing

**Frank Brophy BSc (Hons)**

Executive Technical Director

17 August 2016

## Directors' Report

---

The Directors are pleased to present their report on the affairs of the Company, together with the audited financial statements for the period 1 April 2015 to 31 March 2016.

### Dividends

The Directors do not propose the payment of a dividend, however the Company is currently investigating the mechanics and quantum of a potential distribution of surplus funds to shareholders.

### Directors and Directors' Interests

#### Patrick Cross – Non-Executive Chairman

Patrick Cross has international experience in corporate finance, organisation structures, marketing and joint venture operations. His previous positions include 25 years with BP specialising in marketing, strategic planning and business development across different cultures. He also worked for two years as President of Cable and Wireless Japan, and six years as Managing Director of BBC World Ltd. Patrick Cross has operated in South America, Asia, Europe and the United Kingdom establishing relationships at senior levels with major companies, Governments and the European Commission. He is non-executive chairman of Mercom Capital Plc, was a non-executive director of Orca Interactive Limited, until the company was successfully sold in 2008 and is a Trustee of the Royal Society of Tropical Medicine and Hygiene.

#### Thomas Kelly – Chief Executive Officer

Thomas Kelly has had more than 20 years corporate, finance and investment banking experience. During this period, Thomas Kelly has had involvement in and been responsible for the financing of numerous listed companies on the Australian Securities Exchange (ASX) and several mergers and acquisitions within the Australian corporate sector. Thomas Kelly is a founding director of Empyrean Energy Plc.

#### Frank Brophy – Technical Director

Frank Brophy has over 50 years' experience as a petroleum geologist in the exploration, development and production of many world class projects. Frank Brophy's roles have seen him involved with operations in many locations around the world including Australia, Asia, Europe, USA, Africa and the Middle East. Recent experience includes four years as General Manager of the Hanoi operation in North Vietnam, for France based company Maurel et Prom, and almost two years in Sicily representing the same company in gas appraisal and development. Frank Brophy's previous positions also include his former role as International Business Development Manager for Ampolex Limited, Chief Geologist of Elf Aquitaine Australia and Exploration Manager for five years with Peko Oil Limited.

#### John Laycock – Finance Director

John Laycock has over 30 years' experience in accounting, finance and risk management. His previous positions include 22 years with BP both in UK and international experience in France and Japan. John Laycock has a degree in Mechanical Engineering from Bristol University and is a Fellow of the Chartered Institute of Management Accountants, who is based in the UK.

## Directors' Report (Continued)

The Directors who served during the year to 31 March 2016 had, at that time, the following beneficial interests in the securities of the Company:

	31 March 2016		31 March 2015	
	Number of ordinary shares	Number of options over ordinary shares	Number of ordinary shares	Number of options over ordinary shares
Patrick Cross	340,000	750,000*	340,000	750,000
Thomas Kelly	20,881,563	7,500,000*	20,881,563	7,500,000
Frank Brophy	2,233,333	5,000,000*	2,233,333	5,000,000
John Laycock	1,200,000	450,000*	1,200,000	450,000

\*Granted 2 March 2012 for an exercise price of £0.08. These options expired 19 July 2016.

Other than those items disclosed above, there have been no changes in Directors' interests since the year-end.

### Insurance

The Company maintains liability insurance for the Directors and officers of the Company.

### Significant Shareholdings

On 16 August 2016 the following were registered as being interested in 3% or more of the Company's ordinary share capital, inclusive of Directors holdings above 3%:

	16 August 2016	
	Ordinary shares of £0.002 each	% of issued share capital
James Kight	21,050,000	9.50%
Thomas Kelly	20,881,563	9.41%
Richard Appleby	13,336,000	6.01%

### Share Capital

Information relating to the capital structure is given in Note 19 to the Financial Statements. In summary, at the date of these Financial Statements, there are 221,833,853 ordinary shares on issue and a total of 60,000,000 options granted.

### Going Concern

The Directors consider that the Company has adequate resources to continue in operational existence for the foreseeable future and that it is therefore appropriate to adopt the going concern basis in preparing its financial statements.

### Financial Risk Management

Refer to Note 21 to the financial statements for further details.

## Directors' Report (Continued)

---

### Post Reporting Date Events

There were no significant events post reporting date other than the following:

On 17 May 2016 the Company announced that it had assigned all of its interest in the Sugarloaf Block A project to ConocoPhillips with an effective date of 1 March 2016. The assignment was completed with a consideration equal to all outstanding joint expenditures owed to ConocoPhillips as at the effective date. No funds were required to be exchanged to effect the assignment.

On 19 July 2016 the remaining Director options expired, refer to Directors and Directors' Interests for further information.

On 17 August 2016 the Company announced that the Withholding Tax Certificate Application submitted to the IRS has been approved by the IRS. Following this approval, the Company has received an amount of US\$9.724m which comprises the US\$10.725m (being 15% of the anticipated maximum consideration of US\$71.5m) reduced for the current year tax of US\$1.001m which has been remitted to the IRS. The amount of US\$6.15m (being 10% of the initial purchase price) is currently deposited with an escrow agent to secure the representation, warranty and indemnity obligations of the Company under the PSA entered into with Carrier. The Company now estimates that it will receive US\$2.519m due on or about 19 August 2016. This amount is calculated as 50% of the amount in escrow, reduced for purchase price adjustments of US\$0.111m and subject to withholding tax of 15% of US\$0.445m. The remainder of the escrowed funds will also be subject to withholding tax of 15% and is due for release on or about 19 February 2017.

### Strategic Report

The Company has chosen, in accordance with Section 414C of the Companies Act 2006, to set out the Likely future developments in the business of the Company which would otherwise be required to be contained in the report of the Directors within the Strategic report on pages 4 to 7.

### Auditors

The Auditors, BDO LLP, have indicated their willingness to continue in office and a resolution that they be reappointed will be proposed at the Annual General Meeting.

### Statement of Disclosure to Auditors

Each person who is a Director at the date of approval of this Annual Report confirms that:

- so far as the Director is aware, there is no relevant audit information of which the Company's Auditors are not informed; and
- the Director has taken all steps required to make himself aware of any relevant audit information and to establish that the Company's Auditors are informed of that information.

This confirmation is given and should be interpreted in accordance with the provisions of s418 of the Companies Act 2006.

17 August 2016

## Corporate Governance Report

---

The Directors are committed to maintaining high standards of corporate governance. Under the AIM rules, compliance with the UK Corporate Governance Code ("UK Code") as published in September 2014 is voluntary. The Directors have established procedures, so far as is practicable, given the Company's size, to comply with the UK Code and the recommendations of the Quoted Companies Alliance ("QCA Code") published by Corporate Governance Guidelines. The Company has adopted and operates a share dealing code for directors and senior employees on substantially the same terms as the Model Code appended to the Listing Rules of the UK Listing Authority.

### The Board

The Board met 12 times throughout the year and each member was in attendance at each meeting except the CEO who was unable to attend one meeting and the Technical Director who was unable to attend one meeting. To enable the Board to perform its duties, each of the Directors has full access to all relevant information and to the services of the Company Secretary. If necessary the non-executive directors may take independent professional advice at the Company's expense. The Board currently includes one executive director and three non-executive directors. The Board has delegated specific responsibilities to the committees described below. Patrick Cross is a Non-Executive Director and Chairman of the Company and meets the Company's criteria for independence. His experience and knowledge of the Company makes his contribution to the Board such that it is appropriate for him to remain on the Board and in his position as Chairman. John Laycock is a Non-Executive Director of the Company and meets the Company's criteria for independence.

### Performance Evaluation

The Chairman is responsible for the performance evaluation of the executive and non-executive directors. The Non-Executive Finance Director is responsible for the performance evaluation of the Chairman. The Board as a whole is responsible for the performance evaluation of the Committees and its own performance. These assessments occurred throughout the year.

### The Audit Committee

The Audit Committee comprises Patrick Cross and John Laycock, and is chaired by John Laycock. During the year the Audit Committee met twice and each member was in attendance at each meeting. The Audit Committee reviews the Company's annual and interim financial statements before submission to the Board for approval. The Audit Committee also reviews regular reports from management and the external auditors on accounting and internal control matters. When appropriate, the Audit Committee monitors the progress of action taken in relation to such matters. The Audit Committee also assesses the independence of, recommends the appointment of, and reviews the fees of, the external auditors. The Audit Committee has considered the need for an internal audit function and has deemed the need unnecessary as the Company is not of a size to warrant such a function. The Audit Committee Charter can be found on the Company's website ([www.empyreanenergy.com/corporate/governance](http://www.empyreanenergy.com/corporate/governance)).

### The Remuneration Committee

The Remuneration Committee is made up of Patrick Cross and John Laycock, and is chaired by John Laycock. The Remuneration Committee met once during the year ended 31 March 2016 and each member was in attendance at each meeting. It is responsible for reviewing the performance of the Executive Director and for setting the scale and structure of their remuneration, paying due regard to the interests of shareholders as a whole and the performance of the Company. The Remuneration Committee Charter can be found on the Company's website ([www.empyreanenergy.com/corporate/governance](http://www.empyreanenergy.com/corporate/governance)).

## Corporate Governance Report (Continued)

---

### Nomination Committee

The role of a Nomination Committee is to help achieve a structured Board that adds value to the Company by ensuring an appropriate mix of skills are present in Directors on the Board at all times. As the whole Board only consists of 4 members, the Company does not have a Nomination Committee because it would not be a more efficient mechanism than the full Board for focusing the Company on specific issues. The full Board carries out the functions of the Nomination Committee. The Board did not meet formally as the Nomination Committee during the financial year however any relevant matters were discussed on an as-required basis from time to time during regular meetings of the Board.

### Internal Control

The Board is responsible for the Company's system of internal control and for reviewing its effectiveness annually. Such a system is designed to manage rather than eliminate risk of failure to achieve business objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. The Board has established a continuous process for identifying, evaluating and managing the Company's significant risks. This process involves the monitoring of all controls including financial, operational and compliance controls and risk management. It is based principally on reviewing reports from senior management and professional advisors to ensure any significant weaknesses are promptly remedied and to indicate a need for more extensive monitoring.

### Relationship with Shareholders

The Board attaches a high importance to maintaining good relationships with shareholders and seeks to keep them fully updated on the Company's performance, strategy and management. In addition the Board welcomes as many shareholders as possible to attend its general meeting and encourages open discussion after formal proceedings.

### Corporate Social Responsibility

Whilst the Company is cognisant of its corporate social responsibilities, the Company considers that it is not of the size to warrant a formal policy as the issues that are relevant to this policy are mostly the responsibility of the operators of the wells with which the Company has agreements.

### Bribery Act

Whilst the Company is cognisant of its responsibilities under the Bribery Act, the Company considers that it is not of the size to warrant a formal policy as the Company ensures, through due diligence, that it does not deal with countries known to participate in bribery.

### UK City Code on Takeovers and Mergers

The Company is subject to the UK City Code on Takeovers and Mergers.

### Market Abuse Regime

The Company has adopted and operates a share dealing code for directors and senior employees on substantially the same terms as the Model Code and MAR appended to the Listing Rules of the UKLA.

## Statement of Directors' Responsibilities

---

The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the Company financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the Company for that period. The directors are also required to prepare financial statements in accordance with the rules of the London Stock Exchange for companies trading securities on the Alternative Investment Market.

In preparing those financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with IFRSs as adopted by the European Union, subject to any material departures disclosed and explained in the financial statements;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the requirements of the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

### Website Publication

The Directors are responsible for ensuring the annual report and the financial statements are made available on a website. Financial statements are published on the Company's website in accordance with legislation in the United Kingdom governing the preparation and dissemination of financial statements, which may vary from legislation in other jurisdictions. The maintenance and integrity of the Company's website is the responsibility of the Directors. The Directors' responsibility also extends to the ongoing integrity of the financial statements contained therein.

## Independent Auditor's Report to the Members of Empyrean Energy Plc

---

We have audited the financial statements of Empyrean Energy Plc for the year ended 31 March 2016 which comprise the statement of comprehensive income, the statement of financial position, the statement of cash flows, the statement of changes in equity and the related notes. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union. This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

### Respective responsibilities of directors and auditors

As explained more fully in the statement of directors' responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Financial Reporting Council's (FRC's) Ethical Standards for Auditors.

### Scope of the audit of the financial statements

A description of the scope of an audit of financial statements is provided on the FRC's website at [www.frc.org.uk/auditscopeukprivate](http://www.frc.org.uk/auditscopeukprivate).

### Opinion on financial statements

In our opinion

- the financial statements give a true and fair view of the state of the company's affairs as at 31 March 2016 and of the company's profit for the year then ended;
- the financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union;
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

### Opinion on other matters prescribed by the Companies Act 2006

In our opinion the information given in the Directors' report and Strategic Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

### Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

## Statement of Accounting Policies For the Year Ended 31 March 2016

---

### **Basis of preparation**

The Company's financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union and Companies Act 2006. The principal accounting policies are summarised below. The financial report is presented in the functional currency, US dollars and all values are shown in thousands of US dollars (US\$'000). The financial statements have been prepared on a historical cost basis and fair value for certain assets and liabilities.

### **Nature of business**

The Company is a public limited company incorporated and domiciled in England. The address of the registered office is 200 Strand, London, WC2R 1DJ. The Company was established to finance the exploration, development and production of energy resource projects in geopolitically stable environments. The Company has typically focused on non-operating working interest positions in projects that have drill ready targets that substantially short cut the life-cycle of hydrocarbon projects by entering the project after exploration concept, initial exploration and drill target identification work has largely been completed.

### **Going concern**

The Directors consider that the Company has adequate resources to continue in operational existence for the foreseeable future and that it is therefore appropriate to adopt the going concern basis in preparing its financial statements. The Company had a cash balance of US\$17.473m at 31 March 2016 and has repaid its Macquarie loan facility.

### **Basis of accounting and adoption of new and revised standards**

a) New and amended standards adopted by the Company:

There were no new standards effective for the first time for periods beginning on or after 1 April 2015.

b) Standards, amendments and interpretations that are not yet effective and have not been early adopted:

Any standards and interpretations that have been issued but are not yet effective, and that are available for early application, have not been applied by the Company in these financial statements. International Financial Reporting Standards that have recently been issued or amended but are not yet effective have not been adopted for the annual reporting period ended 31 March 2016:

#### *IFRS 15 Revenue from Contracts with Customers*

IFRS 15 is intended to clarify the principles of revenue recognition and establish a single framework for revenue recognition. The core principle is that an entity should recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This standard is effective for periods beginning on or after 1 January 2018. IFRS 15 is not yet endorsed by the EU. As the Company no longer has significant revenue generating assets, there is currently no impact of IFRS 15 but management will continue to monitor the position.

#### *IFRS 9 Financial Instruments*

IFRS 9 Financial Instruments replaces IAS 39 Financial Instruments: Recognition and Measurement in its entirety. This standard is effective for periods beginning on or after 1 January 2018 with retrospective application. IFRS 9 is not yet endorsed by the EU. The effects of IFRS 15 Revenues from Contracts with Customers and IFRS 9 Financial Instruments are still being assessed, as these new standards may have a significant effect on the Company's future financial statements. The Company does not expect other pronouncements to have a material impact upon the primary statements and disclosure.

## Statement of Accounting Policies (Continued) For the Year Ended 31 March 2016

---

### Revenue recognition

Revenue is derived from sales of oil and gas to third party customers. Sales of oil and gas production are recognised at the time of delivery of the product to the purchaser which is when the risks and rewards of ownership pass and are included in the statement of comprehensive income as Revenue. Revenue is recognised net of local ad valorem taxes. Interest revenue is accrued on a time basis, by reference to the principal outstanding at the effective interest rate applicable.

### Cash and cash equivalents

Cash and short-term deposits in the Statement of Financial Position comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less. For the purposes of the Cash Flow Statement, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

### Tax

The major components of tax on profit or loss include current and deferred tax. Current tax is based on the profit or loss adjusted for items that are non-assessable or disallowed and is calculated using tax rates that have been enacted or substantively enacted by the reporting date. Tax is charged or credited to the income statement, except when the tax relates to items credited or charged directly to equity, in which case the tax is also dealt with in equity.

### Deferred tax

Deferred tax assets and liabilities are recognised where the carrying amount of an asset or liability in the statement of financial position differs to its tax base. Recognition of deferred tax assets is restricted to those instances where it is probable that taxable profit will be available, against which the difference can be utilised. The amount of the asset or liability is determined using tax rates that have been enacted or substantively enacted by the reporting date and are expected to apply when the deferred tax liabilities/(assets) are settled/(recovered). The Company has considered whether to recognise a deferred tax asset and has determined that this is not appropriate in line with IAS 12 as the conditions for recognition are not satisfied.

### Royalties

Royalties or taxes based on production quantities or calculated as a percentage of revenue taken out of net revenue proceeds received.

### Foreign currencies

Transactions denominated in foreign currencies are translated into US dollars at contracted rates or, where no contract exists, at average monthly rates. Monetary assets and liabilities denominated in foreign currencies which are held at the year-end are translated into US dollars at year-end exchange rates. Exchange differences on monetary items are taken to the Statement of Comprehensive Income. Items included in the financial statements are measured using the currency of the primary economic environment in which the Company operates (the functional currency).

### Provisions

Provisions are recognised when the Company has a present obligation as a result of a past event which it is probable will result in an outflow of economic benefits that can be reliably estimated.

### Joint arrangements

Joint arrangements are arrangements in which the Company shares joint control with one or more parties. Joint control is the contractually agreed sharing of control of an arrangement, and exists only when decisions about the activities that significantly affect the arrangement's returns require the unanimous consent of the parties sharing control. Joint arrangements are classified as either joint operations or joint ventures based on the rights and obligations of the parties to the arrangement. In joint operations, the parties have rights to the assets and obligations for the liabilities relating to the arrangement, whereas in joint ventures, the parties have rights to the net assets of the arrangement.

## Statement of Accounting Policies (Continued) For the Year Ended 31 March 2016

---

Joint arrangements that are not structured through a separate vehicle are always joint operations. Joint arrangements that are structured through a separate vehicle may be either joint operations or joint ventures depending on the substance of the arrangement. In these cases, consideration is given to the legal form of the separate vehicle, the terms of the contractual arrangement and, when relevant, other facts and circumstances. When the activities of an arrangement are primarily designed for the provision of output to the parties, and the parties are substantially the only source of cash flows contributing to the continuity of the operations of the arrangement, this indicates the parties to the arrangements have rights to the assets and obligations for the liabilities. The Company accounts for all its joint arrangements as joint operations by recognising the assets, liabilities, and expenses for which it has rights or obligations, including its share of such items held or incurred jointly.

### **Oil and gas assets: exploration and evaluation**

The Company applies the full cost method of accounting for Exploration and Evaluation ('E&E') costs, having regard to the requirements of IFRS 6 'Exploration for and Evaluation of Mineral Resources'. Under the full cost method of accounting, costs of exploring for and evaluating oil and gas properties are accumulated and capitalised by reference to appropriate cash generating units ('CGUs'). Such CGUs are based on geographic areas such as a concession and are not larger than a segment.

E&E costs are initially capitalised within 'Intangible assets'. Such E&E costs may include costs of license acquisition, third party technical services and studies, seismic acquisition, exploration drilling and testing, but do not include costs incurred prior to having obtained the legal rights to explore an area, which are expensed directly to the income statement as they are incurred. Plant, Property and Equipment ('PPE') acquired for use in E&E activities are classified as property, plant and equipment. However, to the extent that such PPE is consumed in developing an intangible E&E asset, the amount reflecting that consumption is recorded as part of the cost of the intangible E&E asset. Intangible E&E assets related to exploration licenses are not depreciated and are carried forward until the existence (or otherwise) of commercial reserves has been determined. The Company's definition of commercial reserves for such purpose is proven and probable reserves on an entitlement basis.

If commercial reserves have been discovered, the related E&E assets are assessed for impairment on a CGU basis as set out below and any impairment loss is recognised in the income statement. The carrying value, after any impairment loss, of the relevant E&E assets is then reclassified as development and production assets within property, plant and equipment and are amortised on a unit of production basis over the life of the commercial reserves of the pool to which they relate. Intangible E&E assets that relate to E&E activities that are not yet determined to have resulted in the discovery of commercial reserves remain capitalised as intangible E&E assets at cost, subject to meeting impairment tests as set out below.

E&E assets are assessed for impairment when facts and circumstances suggest that the carrying amount may exceed its recoverable amount. Such indicators include the point at which a determination is made as to whether or not commercial reserves exist. Where the E&E assets concerned fall within the scope of an established CGU, the E&E assets are tested for impairment together with all development and production assets associated with that CGU, as a single cash generating unit. The aggregate carrying value is compared against the expected recoverable amount of the pool. The recoverable amount is the higher of value in use and the fair value less costs to sell. Value in use is assessed generally by reference to the present value of the future net cash flows expected to be derived from production of commercial reserves. Where the E&E assets to be tested fall outside the scope of any established CGU, there will generally be no commercial reserves and the E&E assets concerned will generally be written off in full. Any impairment loss is recognised in the income statement.

## Statement of Accounting Policies (Continued) For the Year Ended 31 March 2016

---

### **Oil and gas assets: development and production**

Development and production assets are accumulated on a field-by-field basis and represent the cost of developing the commercial reserves discovered and bringing them into production, together with the decommissioning asset (see below) and the E&E expenditures incurred in finding commercial reserves transferred from intangible E&E assets as outlined above. They are presented as oil and gas properties in Note 11. The net book values of producing assets are depreciated on units of production basis. The depletion rate was calculated using the proven 1P reserves.

An impairment test is performed whenever events and circumstances arising during the development or production phase indicate that the carrying value of a development or production asset may exceed its recoverable amount. The aggregate carrying value is compared against the expected recoverable amount of the cash generating unit. The recoverable amount is the higher of value in use and the fair value less costs to sell. Value in use is assessed generally by reference to the present value of the future net cash flows expected to be derived from production of commercial reserves. The cash generating unit applied for impairment test purposes is generally the field, except that a number of field interests may be grouped as a single cash generating unit where the cash flows of each field are interdependent. The Company had potential decommissioning obligations in respect of its producing interests. The extent to which a provision is required in respect of these potential obligations depends, inter alia, on the legal requirements at the time of decommissioning, the cost and timing of any necessary decommissioning works, and the discount rate to be applied to such costs. The Company recognised a provision in its accounts at 31 March 2015 and reversed the provision upon the sale of its producing projects.

### **Assets held for sale and discontinued operations**

Assets are classified as held for sale if their carrying value will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met if the sale is highly probable, the asset is available for sale in its present condition, being actively marketed and management is committed to the sale which should be expected to qualify for recognition as a completed sale within one year from the date of classification. A discontinued operation is a component of an entity that either has been disposed of, or that is classified as held for sale, and represents a separate major line of business or geographical area of operations; and is a part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations; or is a subsidiary acquired exclusively with a view to resale. Non-current assets held for sale and discontinued operations are carried at the lower of carrying value or fair value less costs to sell. Any gain or loss from disposal of a business, together with the results of these operations until the date of disposal, is reported separately as discontinued operations. The financial information of discontinued operations is excluded from the respective captions in the financial statements and related notes for the current and comparative period and disclosed as results from discontinued operations.

### **Financial assets**

Financial assets are recognised at initial recognition at fair value plus, in the case of financial assets not recorded at fair value through profit and loss, transaction costs that are attributable to the acquisition of the financial asset. The Company's financial assets consist of derivative financial assets, loans and receivables, cash and cash equivalents and financial assets classified as fair value through profit or loss. All financials assets, other than the derivative financial asset and cash and cash equivalents are initially measured at fair value and subsequently at amortised cost. The derivative financial asset is measured at fair value through the profit or loss at the point of initial recognition and subsequent revised at each reporting date. Movements in the fair value of derivative financial assets are recognised in the profit or loss, unless they are designated and effective as hedging instruments. The Company doesn't not currently have any hedging instruments. Cash and cash equivalents comprise cash on hand or held on current account or on short-term deposits (up to 90 days) at variable interest rates. Any interest earned is accrued monthly and classified as finance income.

## Statement of Accounting Policies (Continued) For the Year Ended 31 March 2016

---

### **Financial liabilities**

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. The Company's financial liabilities include trade and other payables, loans and borrowings including bank loans and derivative financial liabilities. Financial liabilities, including trade and other payables, loans and borrowings, are initially stated at their fair value and subsequently at amortised cost. Interest and other borrowing costs are recognised on a time-proportion basis using the effective interest method and expensed as part of financing costs in the statement of comprehensive income. Derivative financial liabilities are initially recognised at fair value of the date a derivative contract is entered into and subsequently re-measured at each reporting date. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. The Company has not designated any derivatives as hedges as at 31 March 2015 or 31 March 2016.

When the Company's borrowings are refinanced, the difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is accelerated when the refinancing is considered to be a substantial modification of terms. The refinancing is considered a substantial modification if either the quantitative tests set out by IFRS are breached or the Directors consider the qualitative factors (coupon rate, security, term, etc.) to be a substantial modification. Upfront fees are set-off against the fair value of the liability upon initial recognition and amortised to the income statement using the effective interest method. The derivative recognised at 31 March 2016 relates to share options issued to Macquarie Bank as part of the refinancing. These options were subject to shareholder approval which was received in the post balance sheet period. This transaction falls outside of the scope of IFRS 2 and is fair valued as a derivative financial liability. The cost is recognised as a transaction cost netted off against the loan balance.

### **Share based payments**

The Company issues equity-settled share-based payments to certain employees. Equity-settled share-based payments are measured at fair value at the date of grant. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of shares that will eventually vest. Where equity instruments are granted to persons other than employees, the income statement is charged with the fair value of goods and services received.

### **Significant accounting judgements estimates and assumptions**

The Company makes judgements and assumptions concerning the future that impact the application of policies and reported amounts. The resulting accounting estimates calculated using these judgements and assumptions will, by definition, seldom equal the related actual results but are based on historical experience and expectations of future events. The judgements and key sources of estimation uncertainty that have a significant effect on the amounts recognised in the financial statements are discussed below.

#### *Impairment of assets*

Financial and non-financial assets are subject to impairment reviews based on whether current or future events and circumstances suggest that their recoverable amount may be less than their carrying value. Recoverable amount is based on a calculation of expected future cash flows which includes management assumptions around future production, costs, capital expenditure, inflation and discount rates.

## Statement of Accounting Policies (Continued) For the Year Ended 31 March 2016

---

### *Exploration and evaluation expenditure*

The Company's policy for E&E expenditure requires an assessment of both the future likely economic benefits from future exploitation or sale and whether the activities are at a stage that permit a reasonable assessment of the existence of reserves. Any such assessment may change as new information becomes available. If after capitalisation, information becomes available suggesting that the recovery of the carrying amount is unlikely, the relevant capitalised amount is written off in the statement of comprehensive income in the period when the new information becomes available.

### *Sale of Sugarloaf Projects and associated tax provisions*

The valuation of the taxes associated with the sale of the Sugarloaf projects has been made by the Company's US tax advisors and as such, is subject to certain assumptions with respect to dealings with the IRS. The Company has assessed that the completion of the sale, through the legal process, of the Sugarloaf Block A project was effected at year end as court approval was deemed to be an administrative process and the Company has used the effective date of sale, as per the agreement. As announced on 17 May 2016, the Company had completed its assignment of interests in the Sugarloaf Block A project.

### *Valuation of potential contingent consideration amounts receivable*

In order to calculate the fair value of the contingent consideration as a derivative financial asset, the Company makes estimates principally relating to the assumptions used in its option-pricing model as set out in Note 9.

## Notes to the Financial Statements For the Year Ended 31 March 2016

### 1. Segmental analysis

The primary segmental reporting format is determined to be the geographical segment according to the location of the asset. The Directors consider the Company to have two businesses being the exploration for, development and production of oil and gas properties.

There is one geographical trading segment being North America which is involved in the exploration for, development and production of oil and gas properties. The Company's registered office is located in the United Kingdom.

**7. Discontinued operations**

In February 2016, the Company disposed of its working interest the Sugarloaf AMI project, for a cash consideration of US\$61,500,000. In March 2016, the Company disposed of its working interest the Sugarloaf Block A project, for a consideration of US\$538,000. The consideration shown below is stated after immaterial purchase price adjustments.

The post-tax gain on disposal of discontinued operations was determined as follows:

Consideration received	61,464	-
Costs of disposal	(851)	-
Net consideration	60,613	-
Net assets disposed:		
Oil and gas properties: exploration and evaluation	(4,784)	-
Oil and gas properties: development and production	(54,254)	-
	<hr/>	<hr/>
	(59,038)	-

Amounts held in escrow (Note 11)	(16,875)	-
Derivative financial asset before revaluation	(139)	-
Proceeds from disposal of discontinued operations	43,599	-

**Contingent consideration**

Under the terms and conditions of the PSA for Sugarloaf AMI, the Company is entitled to certain additional amounts if the conditions are met. The conditions for receipt are described below:

- If the average New York Mercantile Exchange strip price of light sweet crude oil (WTI) for the calendar period of 1 January 2016 until 30 June 2016 or 1 July 2016 until 31 December 2016 exceeds US\$55.00 per barrel (the "First Contingency"), then CEP II shall pay to the Company an additional US\$1,000,000 for every whole dollar in excess of US\$55.00 per barrel (collectively, the "First Contingent Payment"); provided, however, the First Contingent Payment shall not exceed US\$5,000,000;
- If the average New York Mercantile Exchange strip price of light sweet crude oil (WTI) for the calendar period of 1 January 2017 until 30 June 2017 or 1 July 2017 until 31 December 2017 exceeds US\$60.00 per barrel (the "Second Contingency"), then CEP II shall pay to the Company an additional US\$1,000,000 for every whole dollar in excess of US\$60.00 per barrel (collectively, the "Second Contingent Payment") provided the Second Contingent Payment shall not exceed US\$5,000,000. If there is no First Contingency Payment, this shall not preclude a Second Contingent Payment if the Second Contingency is met.

The contingent consideration amounts that are potentially receivable are linked to the underlying oil price which is outside of the Company's control, are settled at a date in the future and require no initial investment. As such, the right to receive these amounts therefore represents a derivative. As such the Company has estimated the fair value of the contingent consideration at the date that the sale completed using a Black Average (Asian) Model. The fair value of the contingent consideration at the date that the sale completed which has been included within the overall calculation of the gain arising on disposal of Sugarloaf AMI. Details of the inputs and assumptions used are disclosed in Note 9.

**Notes to the Financial Statements (Continued)**  
**For the Year Ended 31 March 2016**

	<b>2016</b>	<b>2015</b>
<b>8. Earnings per share</b>		
<p>The basic earnings per share is derived by dividing the profit/(loss) after taxation for the year attributable to ordinary shareholders by the weighted average number of shares in issue being 221,833,853 (2015: 221,833,853).</p>		
<u>Earnings per share from continuing operations</u>		
Loss after taxation from continuing operations	<b>(US\$5,722,000)</b>	(US\$3,824,000)
Earnings per share – basic	<b>(2.58)c</b>	(1.73)c
<p>Loss after taxation from continuing operations adjusted for dilutive effects</p>		
Earnings per share – diluted	<b>(2.58)c</b>	(1.73)c
<u>Earnings per share from discontinued operations</u>		
Profit after taxation from discontinued operations	<b>US\$6,635,000</b>	US\$5,571,000
Earnings per share – basic	<b>2.99c</b>	2.51c
<p>Profit after taxation from discontinued operations adjusted for dilutive effects</p>		
Earnings per share – diluted	<b>2.99c</b>	1.98c

For the current financial year, the average price of the Company's shares has been lower than the exercise price of the options and warrants in issue and therefore the exercise of such instruments would be anti-dilutive. As such the diluted earnings per share is the same as the basic loss per share. In the prior year, these options and warrants were dilutive and the weighted average number of dilutive shares were 281,396,593. Details of the potentially issuable shares that could dilute earnings per share in future periods is set out in Note 19.

	<b>371</b>	-

## Notes to the Financial Statements (Continued) For the Year Ended 31 March 2016

### 9. Derivative financial asset (continued)

Derivative financial assets consist of the fair value of contingent consideration amounts attached to the sale of Sugarloaf AMI during the year. Further details on contingent consideration are given in Note 7. The fair value of the options was initially measured at the effective date of the sale, being 19 February 2016 and was subsequently remeasured at 31 March 2016. The fair value is measured using a Black Average (Asian) Model with the following inputs:

Fair value assumptions	At 19 February 2016	At 31 March 2016
Spot price	US\$29.64	US\$38.34
Expected volatility	720-day historical	720-day historical
Risk-free interest rate	0.385% to 0.538%	0.385% to 0.538%

The expected volatility is based on the 720-day historical standard deviation of the log daily returns from WTI oil. The valuation is sensitive to changes in the volatility applied. Sensitivity analysis is provided below:

Volatility applied	Total (US\$'000)	Impact on Income statement (US\$'000)
720 day historical (as used)	371	233
15%	84	59
25%	583	273
50%	1,673	407
	<b>2016</b>	<b>2015</b>
	<b>US\$'000</b>	<b>US\$'000</b>

### 10. Oil and gas properties: exploration and evaluation

Balance brought forward	<b>11,132</b>	8,929
Additions	<b>3,067</b>	3,110
Reclassified to oil and gas properties: development and production (Note 11)	<b>(2,526)</b>	(757)
Impairment <sup>1</sup>	<b>(47)</b>	(150)
Discontinued operations	<b>(4,784)</b>	-
Net book value	<b>6,842</b>	11,132

<sup>1</sup>2015 impairment resulted from Riverbend well review of Wilcox Phase. In the prior year, the carrying value of the Riverbend well was tested for impairment by comparing the carrying value with the recent capitalised expenditure. As the well only remains suspended, with a view to recommencing production in an improved economic environment, it has been partially impaired for the Wilcox Phase of expenditure. 2016 impairment relates to wells that did not spud.

**Notes to the Financial Statements (Continued)**  
**For the Year Ended 31 March 2016**

	<b>2016</b> <b>US\$'000</b>	<b>2015</b> <b>US\$'000</b>
<b>11. Oil and gas properties: development and production</b>		
Balance brought forward	47,788	33,325
Additions	6,263	18,292
Reclassified from oil and gas properties: exploration and evaluation (Note 10)	2,526	757
Movement in Oil and gas decommissioning asset	(469)	252
Impairment <sup>2</sup>	-	(1,905)
Amortisation	(1,698)	(2,933)
Discontinued operations	(54,254)	-
Net book value	<b>156</b>	<b>47,788</b>

<sup>2</sup>2015 impairment resulted from Sugarloaf Block A wells review of future revenue assessment. An impairment of the wells' net book value was made where there was no future revenue expected. A partial impairment of the wells' net book value was made where expected future revenue was lower than the current net book value. Refer to Statement of Accounting Policies: Significant accounting judgements estimates and assumptions – Impairment of assets.

<b>Project</b>	<b>Operator</b>	<b>Working Interest</b>
Riverbend	Huff Energy	10%
Eagle Oil Pool Development	Strata-X	58.084%

Total current borrowings	<u>-</u>	<u>3,544</u>
<b>Non-current borrowings</b>		
Macquarie Bank loan facility <sup>(1)</sup>	-	17,288
Total non-current borrowings	<u>-</u>	<u>17,288</u>

<sup>(1)</sup> The Macquarie Bank loan facility was entered into on 30 May 2012, drawn down on twice during the year and was repayable at an interest rate of 11%pa plus LIBOR. The first repayment was on 28 June 2013 and full repayment was made upon completion of the sale of the Sugarloaf AMI project. Macquarie Bank released the fixed and floating charge over the Company, the Company guarantee and the specific charge over the Sugarloaf AMI project. The unamortised portion of the options, which were granted to Macquarie Bank in relation to the loan facility, was accelerated through to the income statement on repayment of the loan during the year.

<b>16. Derivative financial liabilities</b>		
Derivative associated with Macquarie Bank loan facility:		
Opening balance	428	-
Additions	-	428
Revaluation (Note 3)	<b>(233)</b>	-
	<b>195</b>	<b>428</b>

Derivative financial liabilities consist of the fair value of options attached to the Macquarie Bank loan facility. The options were granted in the 2015 financial year but issued following shareholder approval at the General Meeting on 27 July 2015. The 15,000,000 options are exercisable at £0.10 per option, expiring 26 July 2019. This transaction falls outside of the scope of IFRS 2 and is fair valued as a derivative financial liability. The fair value of the options was initially measured at 31 March 2015 and is subsequently remeasured at each reporting date. The fair value is measured using a Black-Scholes Model with the following inputs:

Revised inputs

Number: 15,000,000; Expiry: 26 July 2019; Exercise price: £0.10; Volatility: 50.00%; Dividends: Nil; Risk-free rate:0.61%. Expected volatility was determined by calculating the historical volatility of the Company's share price over the expected remaining life of the options.

Original inputs

Number: 15,000,000; Expiry: 26 July 2019; Exercise price: £0.10; Volatility: 50.00%; Dividends: Nil; Risk-free rate:0.99%. Expected volatility was determined by calculating the historical volatility of the Company's share price over the expected remaining life of the options.

**17. Deferred tax**

Balance at beginning of year	<b>3,375</b>	-
Income statement (credit)/charge	<b>(2,666)</b>	3,375
Balance at end of year	<b>709</b>	<b>3,375</b>
Comprising:		
Deferred tax asset	-	(15,180)
Deferred tax liability	<b>709</b>	18,555
	<b>709</b>	<b>3,375</b>

The deferred tax assets and liabilities are offset to determine the amounts stated in the Consolidated Statement of Financial Position when the taxes can legally be offset and will be settled net. Deferred taxation comprises:

Deferred tax assets of US\$Nil (31 March 2015: US\$15,181,000) have been recognised in respect of tax losses and to be utilised by future taxable profits generated by operations in the US. The unrecognised deferred tax asset represents losses at a UK company level (2016: \$1,500,000; 2015: \$6,000,000). The Company does not expect to pay tax in the UK as all profits are generated in the US branch and subject to tax in that jurisdiction. The Company claims double tax treaty relief for those taxable profits in the UK.

#### Share options and warrants

The following equity instruments have been issued by the Company and have not been exercised at 31 March 2016 (also refer to Note 16):

Option Class	Director and Company Secretary options	Financier options	Financier options	Financier options	Financier options <sup>(3)</sup>
Grant Date	2 March 2012	19 July 2012	19 July 2012	25 March 2013	27 July 2015
Options / warrants held 31 March 2015	14,400,000	15,000,000	15,000,000	15,000,000	-
Options / warrants granted during year	-	-	-	-	15,000,000
Options / warrants held 31 March 2016	14,400,000	15,000,000	15,000,000	15,000,000	15,000,000
Exercise price (£)	£0.08	£0.08	£0.10	£0.12	£0.10
Expiry date	19 July 2016 <sup>(1)</sup>	19 July 2017	19 July 2017	25 March 2018	26 July 2019
Value per security	£0.0311	£0.018 <sup>(2)</sup>	£0.014 <sup>(2)</sup>	£0.016 <sup>(2)</sup>	£0.018 <sup>(2)</sup>

<sup>(1)</sup>As announced on 2 March 2015, these options had their expiry date extended to 19 July 2017.

<sup>(2)</sup>The value of these options is being expensed over a period of 4 years.

The options outstanding at 31 March 2016 had a weighted average remaining contractual life of 0.47 years and a weighted average exercise price of £0.095.

<sup>(3)</sup>These options have been excluded from the weighted average remaining contractual life calculation above as they do not fall under the scope of IFRS 2. See Note 16.

### 20. Related party transactions

There were no related party transactions during the year ended 31 March 2016 other than disclosed in Note 5.

### 21. Financial instruments

The Company's operations expose it to a number of financial risks. The Board of Directors determine, as required, the degree to which it is appropriate to use financial instruments to mitigate risk. The Company's financial assets comprise derivative financial assets, cash and cash equivalents and trade and other receivables. The Company's financial liabilities comprise of derivative financial liabilities, trade and other payables. It is the Directors' opinion that the carrying value of all of the Company's financial assets and financial liabilities approximates to their fair value. The principal financial risks relate to:

## Notes to the Financial Statements (Continued) For the Year Ended 31 March 2016

---

### 21. Financial instruments (continued)

#### Currency risk

The Company principally holds cash and cash equivalents and amounts held in escrow in Pounds Sterling and US dollars. Exchange rate fluctuations may adversely affect the Company's financial position and results. The Company's financial results are reported in US Dollars and its costs are also primarily incurred in US Dollars. The depreciation of Pound Sterling against the US Dollar could increase the actual capital and operating costs of the Company's mineral exploration projects and materially adversely affect the results presented in the Company's financial statements. Currency exchange fluctuations may also materially adversely affect the Company's future cash flows from operations, its results of operations, financial condition and prospects. The Company intends to use a portion of the US Dollar proceeds from release of the escrow account to fund its exploration asset programme and obligations in the US and amounts held in Pounds Sterling will be used to settle UK-based costs. There is the potential to be exposed to foreign exchange losses or profits on any funds that the Company converts into GBP. The Company has a general policy of not hedging against foreign currency risks. The Company manages foreign currency risk by regularly reviewing the balances held in currencies other than the functional currency to match expected expenditure in foreign currency.

#### Commodity price risk

By the nature of its activities the Company is exposed to fluctuations in commodity prices and in particular the price of WTI oil which could affect its ability to further finance in the future and the viability of its projects. In addition the Company is entitled to contingent consideration amounts relating to the Sale of Sugarloaf AMI in the year. The amount that may be received is linked to oil prices and may increase or decrease depending on fluctuations in the future price of oil. Further details are provided in Notes 7 and 9. The Company closely monitors the price of WTI oil and will consider the use of hedging instruments, where appropriate and as necessary.

#### Credit risk

Credit risk is the risk of financial loss to the Company if a customer or a counter party to a financial instrument fails to meet its contractual obligations. The Company is mainly exposed to credit risk through cash and cash equivalents and the amounts held in escrow and lesser so from its trade and other receivables. The combined total is considered to represent the Company's maximum exposure arising from credit risk. The risk is principally mitigated by reviewing and only placing amounts on deposit with financial institutions that hold acceptable credit ratings. The Company holds all of its cash and funds held in escrow with two financial institutions which represents a concentration of credit risk, however these institutions have been assessed as having adequate credit rating and therefore the Company does not consider the concentration of credit risk to represent a significant risk.

#### Liquidity risk

The Company's policy throughout the year has been to ensure that it has adequate liquidity by careful management of its working capital. The following table details the remaining contractual maturity for the non-derivative liabilities of the Company. The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The table includes both interest and principal cash flows including rates for loan liabilities and cash deposits on actual contractual arrangements.

**Notes to the Financial Statements (Continued)  
For the Year Ended 31 March 2016**

**21. Financial instruments (continued)**

	Less than 6 months	6 months to 1 year	1 to 6 years	Total
	US\$'000	US\$'000	US\$'000	US\$'000
Trade and other payables (2016)	648	-	-	648
Borrowings (2016)	-	-	-	-
Trade and other payables (2015)	3,654	-	-	3,654
Borrowings (2015)	1,000	3,000	19,000	23,000

**Capital**

In managing its capital, the Company's primary objective is to maintain a sufficient funding base to enable the Company to meet its working capital and strategic investment needs. In making decisions to adjust its capital structure to achieve these aims, through new share issues, the Company considers not only its short-term position but also its long-term operational and strategic objectives. The Company continues to take advice on the most tax efficient manner in which to effect a distribution to shareholders and to clarify the procedure required, which may involve both shareholder approval and court approval.

**Determination of fair values**

A number of the Company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and / or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

*(i) Cash & cash equivalents, accounts receivable, accounts payable and accrued expenses*

The fair value of cash & cash equivalents, accounts receivable, accounts payable and accrued expenses is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. As at 31 March 2016 and 31 March 2015, the fair value of cash and cash equivalents, accounts receivable, accounts payable and accrued expenses approximated their carrying value due to their short term to maturity.

*(ii) Derivatives*

*Macquarie options (derivative financial liability)*

The fair value of the Macquarie Bank options is calculated using a Black-Scholes Model. Measurement inputs include share price on measurement date, exercise price of the instrument, expected volatility (based on weighted average historic volatility adjusted for changes expected due to publicly available information), weighted average expected life of the instruments (based on historical experience and general option holder behaviour), expected dividends, and the risk-free interest rate (based on government bonds). A forfeiture rate is estimated on the grant date and is adjusted to reflect the actual number of incentive stock options that vest. Refer to Note 16.

*Sugarloaf AMI Contingent consideration (derivative financial asset)*

The fair value of the contingent consideration is calculated using a Black Average (Asian) Model. Measurement inputs include price of WTI oil on measurement date, threshold price required under the terms of the sale agreement, expected volatility (based on the historical 720-day standard deviation of the log daily returns from WTI oil), expected period, and the risk-free interest rate (based on government bonds).

**Notes to the Financial Statements (Continued)  
For the Year Ended 31 March 2016**

**21. Financial instruments (continued)**

Details of the inputs and assumptions are provided in Note 9.

	<b>31 March 2016 Carrying Value US\$'000</b>	<b>31 March 2016 Fair Value US\$'000</b>	<b>31 March 2015 Carrying Value US\$'000</b>	<b>31 March 2015 Fair Value US\$'000</b>
<b>Financial assets:</b>				
Derivative financial asset	371	371	-	-
Cash and cash equivalents	17,473	17,473	3,955	3,955
Trade and other receivables	161	161	161	161
Amounts held in escrow	16,875	16,875	-	-
<b>Financial liabilities:</b>				
Borrowings	-	-	20,832	20,832
Trade payables	495	495	3,532	3,532
Accrued expenses	153	153	118	118
Derivative financial liability	195	195	428	428

The derivatives noted above in respect of the Macquarie options and the contingent consideration represent level 3 fair measurements. The inputs and assumptions at grant and the reporting date and reconciliation of the movements have been provided in the respective notes:

- Derivative financial asset – Note 9
- Derivative financial liability – Note 16

**22. Events after the reporting date**

There were no significant events post reporting date other than the following:

On 17 May 2016 the Company announced that it had assigned all of its interest in the Sugarloaf Block A project to ConocoPhillips with an effective date of 1 March 2016. The assignment was completed with a consideration equal to all outstanding joint expenditures owed to ConocoPhillips as at the effective date. No funds were required to be exchanged to effect the assignment.

On 19 July 2016 the remaining Director options expired, refer to Directors and Directors' Interests in the Directors' Report for further information.

## Notes to the Financial Statements (Continued) For the Year Ended 31 March 2016

---

### 22. Events after the reporting date (continued)

On 17 August 2016 the Company announced that the Withholding Tax Certificate Application submitted to the IRS has been approved by the IRS. Following this approval, the Company has received an amount of US\$9.724m which comprises the US\$10.725m (being 15% of the anticipated maximum consideration of US\$71.5m) reduced for the current year tax of US\$1.001m which has been remitted to the IRS. The amount of US\$6.15m (being 10% of the initial purchase price) is currently deposited with an escrow agent to secure the representation, warranty and indemnity obligations of the Company under the PSA entered into with Carrier. The Company now estimates that it will receive US\$2.519m due on or about 19 August 2016. This amount is calculated as 50% of the amount in escrow, reduced for purchase price adjustments of US\$0.111m and subject to withholding tax of 15% of US\$0.445m. The remainder of the escrowed funds will also be subject to withholding tax of 15% and is due for release on or about 19 February 2017.
